ABOUT THE ORGANIZER

NDT Corner for Branding Services, LLC.

DIGITAL NDT PLATFORM - INSPECTION MAGAZINE - NDT-X EXPO

We are operating ndtcorner.com, it's an open access portal for Asset Integrity & Industrial Inspection, and NDT professionals. In the meanwhile, publishing a quarterly Inspection magazine for ME & Africa.

We have subscription packages on this platform and the magazine for promoting services, solutions, and products.

Recently we launched the NDT-X Exhibition in Cairo for North Africa. It's the first and leading Expo for the region in such industry.

An experienced team is supporting this with over 20 years in NDT & Welding!

Thank You for Being Part of It!

WELCOME

TO **NDT-X** 2024

Region's Leading NDT, Welding, and Mechanical Integrity Exhibition & Conference.

A regional class environment for NDT, Welding, and Mechanical Integrity across the industry's full chain. A physical opportunity to GENERATE qualified LEADS from Africa region. At the NDT-X and from day one you will be circled by the industry's promising and brilliant sense.

Earn valuable insights from fulfilling sessions delivered by well-known reflection leaders.

NDT, inspection and testing equipment, coating, welding machines, corrosion protection, welding services, industrial safety, and environmental measurements - inspection services - training and qualification - consultations - maintenance and repair.

MESSAGE

From **Dr. Raul Leon**

MECHANICAL ENGINEER, PROFESSIONAL ENGINEER LICENSE
MASTERS IN BUSINESS ADMINISTRATION
ASNT Level III ET, RT, MT VT and UT
NAS410 Level III ET, RT, MT VT, PT and UT

I dedicated my life to develop New Procedures & New NDT Inspection technology. Enjoy all techniques used for Material Characterization using Modern Electronic Microscopes, MPI and Chemical Analysis, Destructive testing including impact testing, Pull, bend and compression testing, hardness, metallography, abrasion testing, and others.

Work on consulting and Root cause investigation services to the aerospace & defense, mining, steel, petrochemical, nuclear & energy, railroad, chemical and other industries.

Passioned new NDT technology like inspection of helicopter bolts, without removing them having only access to the hex screw hole on the head of the bolts and other inspection solutions with limited access, using ultrasonic testing including advanced mode conversions including different types of surface and Raleigh waves.

Worked in the development of a new technique for the inspection of nuclear fuel rods using electromagnetic testing, also in the development of a new NDT technology that correlates to (potentially replaces) Sharp (Impact test) using characterization of the parts by NDT (ultrasonic material characterization) and PMI (this new method is being qualified by Fluor and soon Shell Oil. Work on the development of multiple aerospace NDT manuals and procedures for the aerospace industry like the development of the ones to inspect M18, M117, M125 and M135 helicopters.

Developed since 2003 new NDT procedures and technology to inspect welds (thermo-fusion and electro-fusion) of piping and tubing of HDPE, Polypropylene, other composites, and PVC using TOFD and phased array, and worked as advisor to the ASTM committee for the development of the new ASTM E-3044 standard practice to inspect base materials, HDPE welds and joints using TOFD and Phased Array.

Developed several NDT procedures using digital RT, Electromagnetic testing (Eddy Current, MFL, CFM RFT, Near field, radars, microwaves, etc.), guided waves, acoustic emission and digital radiography.

At present I am responsible level III for some Aerospace Composites Manufacturers in North America and the development of advanced NDT methods for the Defense Industry.

Being focused on developing advanced solutions for topics such as Advanced NDT, materials characterization, 3D Computer Tomography, Photogrammetry, training, technology transfer and electronic microscopy scanning.

Hope to bring to this Congress new inspection and training solutions, new ways to teach, using the latest trends and technology in a fun, innovative and dynamic way.

MESSAGE

From **Dr. Wael Hoziefa**

“Welcome, everyone! Thank you for joining us!

We are excited to have you at today’s conference. NDT-X is the first specific technical conference which related to welding , corrosion , and inspection. We are proud that it will be start in Egypt .This will be an opportunity for us to learn from each other and grow together.

I want to thank our attendances and speakers for taking the time to share their knowledge and giving technical support for each other .

Conference speakers will discuss and give tips that you can use in your own work.

We’ll also take questions throughout the webinar, so please feel free to share your valuable questions.

Now, without further ado, let’s start!”

MESSAGE

From **Eng. ALZAKI ABDULLAH**

TECHNICAL CHAIRMAN OF THE CONFERENCE

In the name of Allah, the most gracious, the most merciful

Ladies and Gentlemen,

ASSALMO ALIKOM WARAHMATULLAH

This is not the first time to participate in engineering inspection conferences and exhibitions in the Middle East region as a speaker and a chairman of one of their committees since the year 2004 to date, but my participation this time is different and equal to or even exceeds all that preceded it.

I have always wished that we would hold these events in my country/region to pass on our experiences to the future generations.

Now my wish is fulfilled, and I am happy and proud to participate in my second homeland, Egypt (Mother of the World) Land of civilizations.

Thank you, Egypt. Thank you, NDT corner. You have made this possible.

Welcome everyone, visitors, exhibitors, and speakers and thank you for your time.

UNLOCKING NEW VALUE **OPPORTUNITIES**

IN THE ASSET MANAGEMENT

THE EXHIBITION

A place to come together to share insights, and concepts, and collaborate to drive progress in Non-Destructive Testing, Industrial Inspection, Welding Technologies, and Corrosion. Whether you're a proficient expert or a newcomer, your perspectives are invaluable.

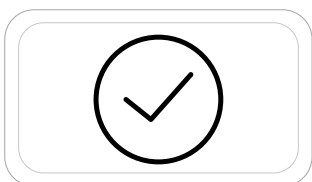

- Explore opportunities & challenges.
- Attending NDT-X is an exclusive and very effective way to meet, network and exhibit your product and solutions to the most relevant audience.
- Discuss business opportunities for ongoing and upcoming projects.
- Prominent marketing benefits and exposure
- Meet investors, buyers, and industry experts.

The NDT-X EXPO is Egypt, Africa, and Mediterranean leading Asset Integrity, Industrial Inspection, Welding, Corrosion, and Mechanical Integrity exhibition and conference.

Position your brand and enhance your marketing opportunities and communicate with your potential customers.

Generate Qualified Leads at the NDT-X Expo provides a regional class environment for trade across the industry's full value chain.

International & Regional exhibiting companies and Arabian & African visitors. NDTX attracts real buying power from around the MENA Region.

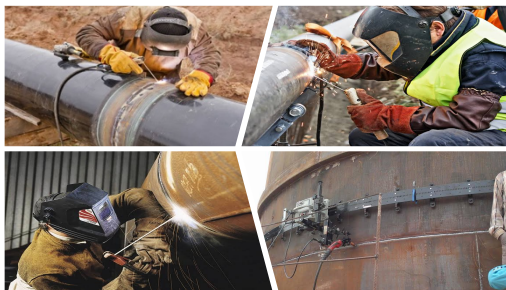

EXHIBITION

SIGNIFICANT SECTORS

SERVICE & MAINTENANCE

Support the maintenance and repair of the equipment thereby, enhancing their performance and uptime. They will ensure your product is safe, reliable. They are responsible for maintaining and repairing industrial processes' equipment, tools, and systems. For the longer life of the equipment, proper maintenance is required.

WELDING

Technological development has become linked to everything, as welding technology has developed significantly. Global manufacturers, regional and local suppliers in addition to Service providers, all of them come together in one place to deliver the latest solutions. Experience the power of diversity at NDTX and get updates on the latest Welding Technology.

MECHANICAL REPAIR

Repair and maintenance are essential to mitigate corrosion, increase safety, reliability, and reduce expenses long term. Equipment maintenance is not just a must, but it is also a significant economic opportunity. When done well, companies can obtain the operational efficiency needed to navigate through volatile oil markets by extending the life of their equipment.

MANUFACTURERS, METALLURGY & CORROSION

Equipment manufacturers, R & D professionals, or service providers, Metallurgy & Corrosion requirements is playing a significant role in such process. The manufactures play a major role in continually evolving the equipment according to the needs of the end-user and the industry.

R & D / SCIENTISTS/ STANDARDS

They set the standards for the equipment design and technology. They are the ones whose efforts bring improvements in the equipment.

TOPICS OF DISCUSSION

- PASSION LEADS TO INNOVATION.
- NDT TRENDS
- Onstream Inspection Program
- Testing in Hazardous Environments.
- Onstream Inspection Program.
- Selection Consideration of NDE in Oil & Gas.
- Bendable X-ray Detectors in NDT
- Radiation Protection
- Real Time RT & Small Controlled Area RT.
- Protection Against Gamma Rays.
- Inspection & Certification Process Transformation into Digital Front.
- Guided Wave Testing Theory & Application.
- Computerized Maintenance Management System & The Power of AI/Automation within the NDT Industry.
- Specialized Application driven technology & Solutions.
- Welding Issues & Tricks from back experience.
- ESAB Digital Solutions
- InduSuite
- Welding Repairs & Hard facing Applications.
- Welding of Dissimilar Materials P11 with P91.
- Phased Array Theory & Applications.
- Limitations & Disadvantages of Advanced Techniques in UT Methods.
- AUTOMATIC DEFECT RECOGNITION IN MPI AND FPI.

DAY 1

7th MAY SPEAKERS

11:00 AM - 12:00 PM

RAUL LEON

NDT CORNER FOR BRANDING SERVICES

NDT-X ORGANIZER
expo.ndtcorner.com

DUBAI - CAIRO
 MIDDLE EAST - AFRICA

Expo Media Partner

ndtcorner.com is a digital platform and unique open access portal for NDT fans, professionals, and pioneers where they can find everything Non-Destructive Testing related and providing a smart access community to connect, share knowledge and news, post events, access inspection resources, show & sell and buy products, promote brands and services. It is operated by a team has a +15 years' experience in marketing and sales for NDT tools covering the ME & A region.

We publish a quarterly inspection magazine "NDT SCOOP" in electronic & printed copies to all NDT related industries. ndtcorner.com/magazine

Platform - Magazine - Expo
 Maximize your brand exposure and awareness globally & greatly for the region's end users.

NDT CORNER Platform		NDT SCOOP Magazine		NDTX Exhibition
------------------------	--	-----------------------	--	--------------------

Our Services?
 Advertise with us and promote your NDT brand, products & Services and enlarge your organization's reach with NDT Corner and NDT SCOOP magazine and secure that your organization has a strong sight across the industry.

We are creating ideas that takes your brand to success and transforming traditional searching, reaching, shopping, and marketing services into smart, quick, and accessible solutions by investing in digitalization to serve tomorrow's needs besides taking the power of the industry to the highest level.

All platform and magazine content are freely accessible. Users & Visitors can see the entire NDT market through the Platform Sections: NDT business directory, Engineers List, Equipment Shop, Courses, Library & Blogs, Jobs and more.

MFE AFRICA

DIAMOND

EGYPT

MFE Africa is dedicated to providing NDT technicians with access to the most advanced NDT and RVI equipment available. Whether you are interested in equipment rentals, sales, calibrations, or repairs, MFE Middle East, Inc. can take care of all your NDT and RVI equipment needs.

SALES

MFE provides Non-Destructive Testing (NDT) and Magnetic Flux Leakage (MFL) inspection equipment. It's sells specialized storage tank and pipeline MFL inspection tools to ensure fast and efficient identification of defects in facility assets. Using modern MFL detection technology.

RENT & SERVICES

We serve a variety of industries with our NDT, RVI and Environmental inspection equipment. Our tools and accessories help ensure safety in the workplace while maintaining equipment integrity! and protecting our clients' bottom line. We offer a large inventory of equipment from top manufacturers.

REPAIR

We provide our clients with outstanding calibration and repair services in the field on Nondestructive Testing equipment and tools at an affordable price with a turnaround time unmatched in this industry.

MFE AFRICA is providing all service to the Middle East and Africa region.

We sell MFL Tank Floor Scanners by MFE Enterprises, since 1994, a U.S. based firm with more than 25 years of solid presence in the market. MFE manufactures Non-Destructive Testing (NDT) and Magnetic Flux Leakage (MFL) inspection equipment. It's manufactures and sells specialized storage tank and pipeline MFL inspection tools to ensure fast and efficient identification of defects in facility assets. Using modern MFL detection technology, MFE Enterprises offers the very best in storage tank and pipeline inspection equipment. Our mission has never changed: We provide educational information to the NDT community about MFL technology and the advantages of deploying our MFL Scanners for FAST and ACCURATE inspection of your plant assets. We have sold scanners around the world to NDT service specialists.

Sales

MFE manufactures Non-Destructive Testing (NDT) and Magnetic Flux Leakage (MFL) inspection equipment. It's manufactures and sells specialized storage tank and pipeline MFL inspection tools to ensure fast and efficient identification of defects in facility assets. GOLD

EGYPT

METEC is a private company working in the field of supplying. From our point of view, parent company's name is sellable by its history and brand name, so we are sensitively selected our partners and mother companies.

We METEC- being parent companies' representative and distributor in Egypt- believe that possessing parent companies' products is not only the idea of buying from one of the biggest manufacturers in the world, but also, it's the notion of the organization's strength behind those products. This is obviously shown in the huge, specialized experts team whose main aim is to reach the customer's satisfaction by putting maintenance , training , technical support, and solutions for different applications between customer's hands. Areas served:

- Aerospace. • Metals & castings. • Oil & gas. • Power generation.
- Transportation. • Petrochemical industries, Oil & gas Chemical.
- Sugar, Cement. • Water treatment & wastewater. These major companies provide the following: • Advanced Inspection Technologies [Equipment & Solutions] and Nondestructive testing accessories. • Projects engineering, management of construction, and welding. • Consultation & Training. • Manpower Supply.

METEC vision: METEC is the ideal gateway of the market to the advanced technology of the first-class worldwide companies. METEC Mission: Facilitate all the benefits and support to our Egyptian based customers that they deserve, being parent company's users. METEC Business logic: Making our technical experienced and back grounded team to speak to customers the same language they use and feel that they get served by a teamwork that is updated with the latest technology in the world to introduce and provide solutions all the time.

EGYPT

EGYMST is an NDT Equipment Supplier for a well-known brands, since NDT requires methods to be non-destructive- which means that the tested objects can be used after inspection completion- hence our main target is to supply products that ensure safety of operation, avoid break down, of high quality and competitive prices. The scope of supply includes:

- Ultrasonic Thickness Gauges.
- Ultrasonic Flaw detection.
- Magnetic Particles Materials and Equipment.
- Dye Penetrant Materials Equipment.
- Paint & Coating Inspection
- Welding Inspection.
- Underwater Inspection.
- X- ray Equipment.
- Radiation Safety Equipment.
- Industrial Films & chemicals.
- Radiographic Accessories
- Darkroom Accessories.
- Eddy Current.
- Hardness Testers.
- Temperature measurements.
- Visual Inspection.
- Pipe & Cable location.
- Books & Publications, Repair.
- Calibration.
- Heat Treatment Machines.
- Leak Detectors.
- Anti- Spatter.
- Pickling Paste.
- Cathodic Protection.
