Welcome Message

Pulse of Innovation

"Empowering Minds, Enable Changes, Unlock Potentials"

Welcome to NDTX & ROBOTEX Expo 2026

It is my great pleasure to welcome you to NDTX Expo 2026, taking place from 14–16 November 2026 at the Egypt International Exhibition Center (EIEC), Cairo.

NDTX has been created with a clear vision: to bring together the people, technologies, and ideas shaping the future of Non-Destructive Testing, Welding, Corrosion, Asset Integrity, and Industrial Inspection across Africa, the Middle East, and beyond.

This year's edition represents an important step forward, bringing together leading technology providers, manufacturers, service companies, industry professionals, experts, decision-makers, and knowledge institutions from around the world. Beyond the exhibition floor, NDTX provides a platform for technical exchange, professional networking, innovation, and meaningful business opportunities.

As industries continue to embrace digital transformation, advanced inspection technologies, automation, artificial intelligence, and smarter asset management, the role of inspection and integrity professionals is becoming more important than ever. NDTX aims to support this evolution by creating a space where expertise meets technology and where new ideas can become practical solutions for industry.

I would like to extend my sincere appreciation to our exhibitors, sponsors, speakers, partners, supporting organizations, and every professional who has contributed to making NDTX possible.

Most importantly, I welcome every visitor to explore the technologies, exchange knowledge, meet industry leaders, discover new opportunities, and be part of the community shaping the future of inspection and industrial integrity.

Welcome to NDTX Expo 2026.

Let's connect expertise, technology, and industry to **build a safer, smarter, and more sustainable future.**

Sincerely,
Mohamed Zina

Unlocking Potentials, Pulse of Innovation

NDT WELDING ASSET INTEGRITY

Edition: 3rd 2026

Venue: EIEC – New Cairo

Duration: Three days

Next Edition: 2028

NDTX is the region's dedicated exhibition and conference in Asset Integrity, Non-destructive Testing, Corrosion, and Welding. The show host regional & international leaders in industry, where the attendance will be global and regional that supply and provide inspection services and welding technologies. This exhibition brings for the first time in Egypt, experts who innovative, provide high-quality content with the latest topics in Industry.

A premier event for individuals and companies. It provides opportunities for learning, networking, and exposure to the latest technologies.

The NDTX contributes to improving the national vision and attracting global experts. The first international exhibition and global platform to showcase the industrial inspection scene, non-destructive testing, integration and safety of industrial assets in Egypt for the Africa and Middle East region.

NDTX 2026 is held under the slogan "**Expertise & Technology shaping the future of industry**" with the participation of global manufacturers and suppliers, quality, and testing service providers, training, qualification & certification companies.

ATTENDEES

The show gathers key industry players from Oil & Gas, Petrochemicals, Aerospace, Marine, Energy, Transportation, Power, Fabrication, Construction, and other related heavy industrial sectors.

From the entire region (Egypt, Algeria-Libya-Tunisia-Iraq-Saudi Arabia-UAE and some other African & Arab countries), with over 15,000 visitors expected from 500 organizations.

Benefits & Value brough by the Expo

- Introducing modern technologies.
- Training and workshops for participants for NDT.
- Professional network of industry experts.
- Enhancing safety, quality: standards/requirements.
- Showcasing the latest solutions in the world.
- Industry: Helps companies improve their efficiency.

NDTX EGYPT 2026

NDT X 2026

A Platform for International Collaboration

A place to come together to share insights, and concepts, and collaborate to drive progress in Non-Destructive Testing, Asset Integrity, Industrial Inspection, Welding Technologies, and Corrosion. Whether you're a proficient expert or a newcomer, your perspectives are invaluable.

ONE TO ONE NETWORKING

Meet with the regional & international oil and industry players, government representatives and technology associated.

DYNAMIC DISCUSSION ON ADVANCING THE NDT, ASSET INTEGRITY, CORROSION CONTROL, AND WELDING.

2026

EXPO.NDTCORNER.COM

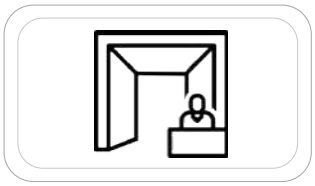

THE EXHIBITION

A place to come together to share insights, and concepts, and collaborate to drive progress in Non-Destructive Testing, Industrial Inspection, Welding Technologies, and Asset Integrity. Whether you're a proficient expert or a newcomer, your perspectives are invaluable.

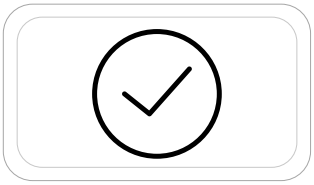

- Explore opportunities & challenges.
- Attending NDTX is an exclusive and very effective way to meet, network and exhibit your product and solutions to the most relevant audience.
- Discuss business opportunities for ongoing and upcoming projects.
- Prominent marketing benefits and exposure
- Meet investors, buyers, and industry experts.

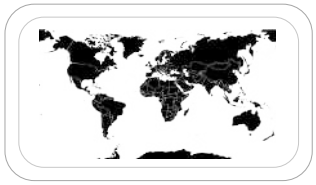

The NDTX EXPO is Africa & Middle East 's leading Asset Integrity, Industrial Inspection, Welding, Corrosion, and Mechanical Integrity exhibition and conference.

Position your brand and enhance your marketing opportunities and communicate with your potential customers.

Generate Qualified Leads at the NDTX Expo provides a regional class environment for trade across the industry's full value chain.

International & Regional exhibiting companies and Arabian & African visitors. NDTX attracts real buying power from around the MENA Region.

EXIBITION

SIGNIFICANT SECTORS

SERVICE & MAINTENANCE

Support the maintenance and repair of the equipment thereby, enhancing their performance and uptime. They will ensure your product is safe, reliable. They are responsible for maintaining and repairing industrial processes' equipment, tools, and systems. For the longer life of the equipment, proper maintenance is required.

WELDING & FABRICATION

Technological development has become linked to everything, as welding technology has developed significantly. Global manufacturers, regional and local suppliers in addition to Service providers, all of them come together in one place to deliver the latest solutions. Experience the power of diversity at NDTX and get updates on the latest Welding Technology.

MECHANICAL REPAIR

Repair and maintenance are essential to mitigate corrosion, increase safety, reliability, and reduce expenses long term. Equipment maintenance is not just a must, but it is also a significant economic opportunity. When done well, companies can obtain the operational efficiency needed to navigate through volatile oil markets by extending the life of their equipment.

MANUFACTURING, INDUSTRIAL ROBOTS

Equipment manufacturers, R & D professionals, or service providers, Metallurgy & Corrosion requirements is playing a significant role in such process. The manufactures play a major role in continually evolving the equipment according to the needs of the end-user and the industry.

R & D / Artificial Intelligence

They set the standards for the equipment design and technology. They are the ones whose efforts bring improvements in the equipment.

COMPETITION Structure

INSPECTOR'S CHAMPION

The **Inspectors Competition** at NDTX brings together top talent in Non-Destructive Testing (NDT) from across the nation.

PARTICIPANTS will demonstrate precision, technical knowledge, and interpretation skills across various testing methods.

This competition highlights the critical role of inspectors in ensuring structural integrity, safety, and compliance across industries.

Why it matters:
By showcasing the capabilities of skilled inspectors, the competition elevates standards, encourages best practices, and promotes innovation in NDT methodologies – making it a key attraction for industry professionals, educators, and technology providers.

WELDER'S CHAMPION

The **Welders Championship** at NDTX brings together top talent in Welding from across the nation.

PARTICIPANTS will be evaluated on weld quality, safety practices, and adherence to specifications and codes.

This high-skill competition underscores the essential role of welders in infrastructure, manufacturing, Oil & Gas, energy, and defense.

Why it matters:
By spotlighting welding excellence, the event fosters pride in skilled trades, encourages workforce development, and connects talent with industry leaders. It also serves as a live demonstration of how precision and expertise directly impact quality and safety in engineering.

NDTX EXPO
Expo.ndtcorner.com

NDT COMPETITION
مسابقة التفتيش

Registration & Steps

COMPETITION NAME:

NDTX Inspectors Champion

STEP 1 خطوة ١

01 Registration:

- Go to Expo.ndtcorner.com
- Register as a visitor
- Select UT, PAUT Competitions.
- You will receive QR pass to the EXPO.

STEP 2 خطوة ٢

02 Competition Date & Place:

- Egypt International Exhibition Center
- During Expo days (14-15-16 November 2026).
- Attend at 10:00 AM and confirm your data.

STEP 3 خطوة ٣

03 Test

- Provide the Inspectors a defected sample.
- Begin to detect the weld defect.
- Record the Results.

STEP 4 خطوة ٤

04 Evaluation and Marks:

Evaluate the participant based on the welding inspection according to Standards and Codes.

STEP 5 خطوة ٥

05 Winners and Awards:

Awards, Certificates, and Rewards to be presented by the Expo management at the 3rd day

خطوات الاشتراك في المسابقة

اسم المسابقة:

بطولة NDTX الدولية للمفتشين

١ التسجيل:

- الدخول على موقع المعرض expo.ndtcorner.com
- تسجيل زائر وملئ البيانات.
- إضافة واختيار المشاركة مسابقة التفتيش الهندسي. **(UT – PAUT)**
- سيتم استلام كارت الدخول على البريد الالكتروني.

٢ مكان وميعاد المسابقة:

- مركز مصر للمعارض الدولية - التجمع الخامس.
- خلال أيام المعرض ١٤-١٥-١٦ نوفمبر ٢٠٢٦.
- الحضور 10 صباحا وتأكيد البيانات بجناح المسابقة.

٣ مرحلة الاختبار:

- تسليم المتسابق عينة بها احد عيوب اللحام.
- يبدئ في الكشف علي اللحام بأجهزة UT او PAUT
- يسجل نتيجة الكشف وبيانات العيب.

٤ مرحلة التقييم:

يتم تقيم نتيجة الفحص للحام التي تم تدوينها بواسطة المتسابق والتآكد من التزامة بالمعايير والاكواد الدولية.

٥ الفائزين والجوائز:

تسليم الجوائز والشهادات من قبل إدارة تنظيم المعرض في اليوم الثالث للمعرض.

Exciting at the EXPO HALL

NDTX

EGYPT

Places around you in Cairo

Pyramids of Giza

A complex of three massive pyramids constructed during the Fourth Dynasty of the Old Kingdom (c. 2600-2500 BC) as tombs for pharaohs. The three main pyramids are those of Khufu (the Great Pyramid), Khafre, and Menkaure. The Great Pyramid, the largest of the three, is one of the Seven Wonders of the Ancient World and is renowned for its size and intricate construction, including interior chambers and passages.

Grand Egyptian Museum

The Grand Egyptian Museum is the world's largest archaeological museum dedicated to a single civilization, ancient Egypt. It's located near the Giza pyramids, about 2 kilometers (1.2 miles) from the Giza pyramid complex. The museum house over 100,000 artifacts, including the complete Tutankhamun collection, with many pieces for the first time.

Nile Cruise

A Nile River cruise in Cairo offers a unique way to experience the city and its iconic river. Options range from short dinner cruises with entertainment to longer multi-day excursions, often combined with visits to other Egyptian historical sites.

Khan El-Khalili

Khan El-Khalili is a historic marketplace in the heart of Islamic Cairo, known for its bustling atmosphere and traditional crafts and souvenirs. It's a popular destination for both tourists and locals, offering a glimpse into Cairo's rich cultural heritage. The market features winding alleyways filled with shops selling items like spices, jewelry, glassware, and textiles.

NDTX EXPO 2026 is proudly **held under the patronage** of the Ministry of Industry of the Arab Republic of Egypt.

The Egyptian Ministry of Industry (officially the Ministry of Industry and Trade) is the cabinet-level government body in Egypt responsible for driving industrial development, localizing manufacturing, and expanding foreign trade.

Ministry of Industry

EGYPT

Leadership
Minister: Khaled Hashem (appointed February 11, 2026)

- Headquarters: New Administrative Capital
- Official Portal: mind.gov.eg

الهيئة المصرية العامة للمواصفات والجودة
Egyptian Organization for Standardization and Quality

The Egyptian Organization for Standardization and Quality

EGYPT

The Egyptian Organization for Standardization and Quality (EOS) is the official and competent national authority responsible for all matters related to standardization, quality assurance, and metrology in Egypt.

Founded in 1957, **EOS operates under the Ministry of Industry,** serving as the cornerstone for enhancing the competitiveness of Egyptian products in both local and international markets.

The organization plays a vital role in protecting consumers and boosting the national economy. Its core responsibilities include:

- Developing National Standards: Crafting and issuing Egyptian standards across various industrial and agricultural sectors to ensure safety and performance.
- Quality Assurance: Granting quality marks, conformity certificates, and the prestigious Egyptian "Quality Mark" to compliant factories.
- International Alignment: Representing Egypt in regional and global organizations like the ISO, ensuring local products align with international criteria to facilitate seamless export and trade.
- Metrology and Testing: Providing calibration services and consumer protection by verifying that products meet strict health, safety, and environmental regulations.

Through these comprehensive services, EOS bridges the gap between local production and global standards, driving industrial growth and fostering trust in Egyptian-made goods worldwide.

WEBSITE: www.eos.org.eg

The Egyptian Accreditation Council

EGYPT

The Egyptian Accreditation Council (EGAC) is the sole national body recognized by the Egyptian government for accrediting conformity assessment bodies. Established by Presidential Decree No. 312 of 1996 and reorganized by Decree No. 248 of 2006, **EGAC operates under the Ministry of Industry.** It serves as a critical pillar of Egypt's quality infrastructure, ensuring compliance with international standards.

EGAC evaluates and accredits various organizations, including testing and calibration laboratories, medical laboratories, inspection bodies, and certification bodies for management systems and products. By aligning its operations with global benchmarks like ISO/IEC 17011, EGAC grants formal recognition to technically competent facilities.

As a full member of the International Laboratory Accreditation Cooperation (ILAC) and the International Accreditation Forum (IAF), EGAC has signed multiple Mutual Recognition Arrangements (MRAs). These global agreements ensure that certificates and test reports issued by EGAC-accredited bodies are accepted worldwide.

Ultimately, EGAC plays a vital role in enhancing the competitiveness of Egyptian exports, eliminating technical barriers to trade, and safeguarding consumer health and safety. By fostering trust in local markets, it builds a reliable bridge between Egyptian businesses and the global economy.

WEBSITE: egac.gov.eg

The Tabbin Institute for Metallurgical Studies

EGYPT

The Tabbin Institute for Metallurgical Studies (TIMS) is a prestigious, specialized educational and research institution located in Cairo, Egypt. Established in 1968 through a cooperation between Egypt and the Soviet Union, TIMS **operates under the Egyptian Ministry of Industry**. Its primary mission is to bridge the gap between academic research and industrial application, focusing heavily on metallurgy, engineering, and manufacturing technologies.

TIMS plays a vital role in supporting Egypt's industrial sector by offering postgraduate diplomas, master's degrees, and tailored training programs for engineers and technicians. The institute specializes in key areas such as mineral processing, iron and steelmaking, energy efficiency, and environmental engineering. By combining theoretical knowledge with practical, hands-on training, TIMS ensures that the industrial workforce is equipped with modern technological skills.

In addition to education, TIMS functions as a prominent research and development (R&D) hub. It provides technical consultations, industrial testing, and quality control services to various factories and enterprises across Egypt. Through its focus on sustainability and industrial modernization, the Tabbin Institute remains a cornerstone in driving Egypt's economic growth, fostering local innovation, and advancing the nation's heavy industries toward a more sustainable future.

مركز تكنولوجيا الصناعات الهندسية
Engineering Industries Technology Center

The Engineering Industries Technology Center

EGYPT

The Engineering Industries Technology Center (EITC) in Egypt is a key technical and industrial institution, **operates under the Egyptian Ministry of Industry**

Core Mission and Services

• Technology Transfer: Acting as a vital service hub that transfers modern engineering technologies to local factories and enterprises.

• Technical Support & Consultation: Offering specialized engineering consultations, design assistance, and technical studies.

• Equipment & Design Inspection: Inspecting new equipment, evaluating engineering drawings, testing feasibility, and issuing official validation certificates for manufacturers.

• Training Programs: Delivering professional training courses for engineers and technicians to upgrade workforce skills.

• Supporting New Investors: Providing smooth procedural guidance and technical assistance to startup manufacturers and investors without unnecessary obstacles.

The center plays an essential role in bridging the gap between industrial innovation and practical execution, helping enhance the competitiveness of Egypt's engineering and manufacturing sectors in line with international quality standards.

The Central Metallurgical Research and Development Institute (CMRDI) drive the industrial innovation in Egypt. Since the 1980s, with support from UNIDO, we've excelled in metallurgy, minerals, and advanced materials. Our goal is to enhance efficiency and sustainability across key industries, preparing Egypt for future success. With cutting-edge research facilities and a team of expert scientists, CMRDI plays a vital role in transforming scientific breakthroughs into practical industrial solutions. We collaborate with both local and global partners to foster technological advancements, from modernizing production techniques to pioneering eco-friendly materials.

GOEIC - General Organization for Export and Import Control

EGYPT

It is a service- provider organization that works to protect the consumer and preserve Egypt's reputation by examining commodity exports and imports with the latest scientific methods and equipment, as well as preparing statistics on exports and imports. The General Organization for Export and Import Control works with the sectors of the Ministry of Investment and Foreign Trade as a cooperating system whose main and primary goal is to facilitate the movement of trade, encourage Egyptian industries, develop exports of all kinds, and raise their competitive capabilities in all global markets to achieve progress and prosperity for the country and the Egyptian citizen. In accordance with the provisions of Presidential Decree No. 378 of 1999, the General organization for Export and Import Control is one of the bodies directly affiliated to the Minister of Trade and Industry.

The organization performs the following activities:

Selective quality control over exports and imports.

The organization is one of the state agencies as a service and executive body that specializes in quality control over exports and imports of industrial goods, and the issuance of certificates of origin and commercial registrations.

Issuance of the following records:

- Register of Exporters
- Importers record
- Register of commercial agents
- Register of scientific and consultancy offices
- Register import cards for production requirements for factories

Issuance of certificates of origin for Egyptian-originating products and that acquired Egyptian-origin status. :

NDTX Welders Champion Sponsor

Lincoln Electric is an American multinational manufacturer and the global market leader in arc welding equipment, robotic welding systems, plasma and cutting equipment, and brazing and soldering alloys. Founded in 1895 by John C. Lincoln and later expanded by his brother James F. Lincoln, the company is headquartered in Cleveland, Ohio. Today, it operates a vast global manufacturing network with dozens of facilities worldwide, serving diverse industries including automotive, construction, energy, and aerospace.

The company is widely recognized for its technological innovation and high-quality products. It pioneered many foundational technologies in the welding industry, making arc welding safer, more reliable, and highly efficient. Beyond its products, Lincoln Electric is globally renowned in business history for its unique corporate culture and the "Lincoln Incentive Management System." This model emphasizes an incentive performance-based bonus system and a guaranteed employment policy, which has fostered immense employee loyalty and high productivity for decades.

As industrial manufacturing transitions into the digital age, Lincoln Electric continues to lead by integrating advanced automation, artificial intelligence, and software solutions into its welding systems. This commitment ensures that it remains the premier choice for welding professionals and industrial manufacturers worldwide.

UK

NDTX Inspectors Champion Sponsor

Founded in 1958, Sonatest is the leading manufacturer of Ultrasonic inspection equipment. We are recognized and respected around the world for the quality of our rugged portable products which can be found in every industry and application.

Pioneering Ultrasonics in the NDT Industry Since 1958

Whether it is conventional ultrasonics or advanced cutting edge phased array with TFM. Sonatest is your partner for Non-Destructive Testing solutions whatever your industry or application.

Our products are used by the world's biggest and most innovative companies. Shell, Airbus, Siemens and Arcellor Mittal are amongst the thousands of customers who use Sonatest instruments to ensure that their products and processes are safe and reliable.

Innovative Product Design
Sonatest products are guided by the values of Simplicity, Capability and Reliability. Innovation is at the core of not only our design and development programmes but our whole way of working. We strive to provide an easy enjoyable experience when working with and being a part of the Sonatest family.

The market leading flaw detector WAVE has gained a reputation which is the envy of our competitors. Our user interface has set the industry standard. The advanced phased array Veo3 and Prisma reinforce our reputation for innovative product development of instruments focused on providing the technician with an efficient user experience. The RSflite leads the world in composite inspection technology.

ASNT - American Society for Nondestructive Testing

USA

ASNT is the association for nondestructive testing (NDT) professionals committed to making the world a safer place. NDT professionals detect irregularities, flaws, and defects in materials, components, and structures that could compromise the safety, reliability, or functionality of an object or structure.

Established in 1941, ASNT supports members with certifications, professional development, industry insights, advocacy, events, publications, and networking opportunities and is focused on fostering the growth of future generations of NDT professionals through the ASNT Foundation.

Serving more than 22 000 members and certificate holders worldwide, ASNT is the largest technical society for NDT professionals. ASNT is based in Columbus, Ohio, with offices in Houston, Texas, Washington, D.C. and Chennai, India.

Building the Integrity of Industry.

EGYPT

MFE is dedicated to providing NDT technicians with access to the most advanced NDT and RVI equipment available. Whether you are interested in equipment rentals, sales, calibrations, or repairs, MFE Middle East, Inc. can take care of all your NDT and RVI equipment needs.

SALES

MFE provides Non-Destructive Testing (NDT) and Magnetic Flux Leakage (MFL) inspection equipment. It's sells specialized storage tank and pipeline MFL inspection tools to ensure fast and efficient identification of defects in facility assets. Using modern MFL detection technology.

RENT & SERVICES

We serve a variety of industries with our NDT, RVI and Environmental inspection equipment. Our tools and accessories help ensure safety in the workplace while maintaining equipment integrity! and protecting our clients' bottom line. We offer a large inventory of equipment from top manufacturers.

REPAIR

We provide our clients with outstanding calibration and repair services in the field on Nondestructive Testing equipment and tools at an affordable price with a turnaround time unmatched in this industry.

EGYPT

Founded in 2013 by ambitious Egyptian youth, Simplex CNC has grown into a leading regional manufacturer and exporter of Computer Numerical Control (CNC) machinery. Starting from humble beginnings, the company has transformed into a major industrial powerhouse—exemplified by its expansive 40,000-square-meter manufacturing facility in 10th of Ramadan City—producing over 1,000 machines annually and serving clients across more than 17 countries.

Simplex specializes in engineering and fabricating high-precision equipment tailored for diverse sectors. Their core product lineup includes CNC routers, plasma cutters, fiber laser metal-cutting systems, cylinder milling machines, and specialized marble routers. In addition to local manufacturing, the company imports complementary heavy industrial machinery—such as press brakes, metal shearing tools, and edge-banding solutions—to provide a comprehensive ecosystem for workshops and factories.

Beyond hardware, Simplex CNC distinguishes itself through end-to-end customer support. They offer free comprehensive theoretical and practical training (requiring no prior experience), a one-year full parts warranty, and reliable post-warranty maintenance. By bridging local innovation with international standards, Simplex continues to drive industrial self-reliance and technological growth across Egypt and the Middle East.

Our comprehensive portfolio includes advanced inspection equipment, X-ray systems, digital radiography, ultrasonic testing, magnetic particle and penetrant testing, remote visual inspection, and advanced inspection technologies.

AUTHORIZED AGENT IN EGYPT

At EGYMST, we understand that reliable inspection is essential to maintaining asset integrity, protecting infrastructure, and ensuring product quality. Our solutions serve customers across multiple sectors, including oil and gas, petrochemicals, marine, offshore, steel construction, manufacturing, refining, piping, and other industrial applications.

40 Year ANNIVERSARY +

Our commitment extends beyond providing high-quality products. EGYMST aims to be a long-term technical partner, supporting customers throughout the equipment lifecycle with services designed to maximize performance and reliability.

Our services include:

- Equipment Supply: Access to advanced inspection technologies from internationally recognized manufacturers.
- Equipment Rental: Flexible rental solutions for selected NDT equipment, supporting project-specific requirements.
- Technical Consultation: Assistance in identifying suitable equipment and solutions for different inspection applications.
- After-Sales Support: Continued customer support to help maintain equipment performance.
- Maintenance & Spare Parts: Support for equipment servicing and maintenance requirements.
- Training & Technical Knowledge: Training opportunities covering equipment operation and advanced inspection techniques.

Ekoscan is a prominent global leader and innovative manufacturer specializing in advanced Non-Destructive Testing (NDT) solutions. With over 40 years of trusted industry expertise, the company effectively designs, develops, and delivers advanced measuring instruments, ultrasonic sensors, eddy current imaging, and custom robotics. By seamlessly integrating high-performance electronic hardware with tailor-made software, Ekoscan ensures unparalleled inspection precision and operational efficiency for highly complex industrial environments.

FRANCE

The brand's comprehensive, modular product portfolio features automated scanners like the AI-powered Venom crawler, multi-application electronics, precision ultrasonic probes, and intuitive data processing software. These cutting-edge technologies enable real-time diagnostics, robust structural health assessments, and precise corrosion mapping without damaging critical infrastructure or disrupting day-to-day operations.

Ekoscan's highly specialized systems serve high-stakes sectors where asset integrity and absolute safety are completely non-negotiable. Key global markets include nuclear energy, aerospace, oil and gas, renewable energy, railways, and heavy manufacturing industries. By identifying sub-surface flaws, cracks, and structural wear early, Ekoscan helps operators prevent catastrophic failures, extend the service life of critical infrastructure, and minimize industrial waste. Headquartered in France with an expanding international presence, Ekoscan continues to redefine the NDT industry through its unwavering commitment to reliable engineering, sustainable asset management, and advanced digital diagnostics.

FINLAND

Pexraytech is a pioneering high-tech company based in Finland that specializes in developing state-of-the-art portable X-ray imaging solutions. Operating at the cutting edge of digital radiography, the company serves two critical global sectors: Industrial Non-Destructive Testing (NDT) and security and defense operations.

In the industrial field, Pexray is revolutionizing quality control by facilitating the transition from traditional film imaging to Direct Digital Radiography. Its innovative product line includes ultra-slim digital detectors like the PXR Micro 10 and advanced battery-powered generators such as the PXR GEN160-09. These lightweight, highly mobile systems enable operators to inspect weld seams, pipeline corrosion, and confined aerospace structures with unprecedented speed, exceptional clarity, and maximum safety, all without using dangerous radioactive isotopes.

For security applications, Pexray provides explosive ordnance disposal (EOD) teams, bomb squads, and customs officials with robust, drop-resistant tactical kits. These portable systems deliver high-resolution, real-time internal imaging of suspicious objects and packages, which is vital for quick decision-making under extreme pressure. By prioritizing user-centric design, long-lasting battery life, and complete wireless freedom, Pexray ensures that professional operators can safely execute precision imaging in the most demanding field environments. As industries and defense forces continue to modernize, Pexraytech remains committed to pushing the boundaries of portable scanning technology worldwide.

GLOBAL NON-DESTRUCTIVE TECHNOLOGIES

GNDT HEAVY EQUIPMENT TRADING LLC

UAE

GNDT, headquartered in Dubai, UAE, is a leading solutions provider for the Oil and Gas, aerospace,construction, mining, and industrial sectors across the Middle East and Africa.

Since its inception, GNDT has been committed to reducing operational inefficiencies by providing cutting-edge technologies and industry-first solutions. Whether it's supplying high-tech analyzers, top-tier safety equipment. GNDT ensures that clients have access to reliable and cost-effective products to keep their operations running smoothly.

GNDT's mission is to eliminate operational delays through innovative products and services, ensuring that businesses can achieve maximum efficiency. Our highly skilled team is dedicated to providing technical consultation and tailored solutions, creating long-term partnerships that drive success.

GNDT supports industries like mining, infrastructure development, and oil and gas, ensuring our clients stay ahead in a competitive market. With operational branches and service centers strategically located, GNDT guarantees swift delivery and expert support wherever needed.

SIUI

CHINA

SIUI NDT (Shantou Institute of Ultrasonic Instruments) is a global leader in Non-Destructive Testing, specializing in advanced ultrasonic imaging technology. Founded in 1978, the company has established itself as an industry pioneer, delivering cutting-edge inspection solutions that ensure safety, quality, and structural integrity across various critical sectors worldwide.

The company offers a comprehensive portfolio of high-performance NDT equipment. Their core product line includes:

- **Phased Array (PA) flaw detectors** for complex volumetric inspections.
- **Time-of-Flight Diffraction (TOFD) systems** for precise weld sizing.
- **Conventional ultrasonic testing (UT) devices** for reliable day-to-day flaw detection.
- **Advanced thickness gauges** for accurate material loss monitoring.

These state-of-the-art instruments are widely deployed in heavy industries such as aerospace, oil and gas, petrochemicals, power generation, railway transit, and automotive manufacturing. By integrating smart software, ergonomic designs, and rugged hardware, SIUI enables technicians to detect internal defects, cracks, and corrosion with extreme precision.

With a strong commitment to continuous research and development, SIUI complies with international quality standards like ISO and CE. Their commitment to innovation and reliable customer support makes them a trusted partner for industrial safety and quality control solutions globally.

FOERSTER MIDDLE EAST FZE (FME)

UAE

Since 1948, the name FOERSTER has been synonymous with quality and precision. We develop and produce units and systems for the non-destructive testing of metallic materials, metal detection, and magnetics. Additionally, FOERSTER offers non-destructive materials testing services in the chemical industry throughout the world. Reformer tube testing being the main focus of our activities.

We operate globally and always in close proximity to our customers thanks to our sales and service network of 10 subsidiaries and qualified representations in over 60 countries.

We are a technological leader and act as a competent system partner and solution provider for our customers. We make the hidden visible. Leading with foresight and a sense of social responsibility, Felix Förster is the third generation of his family to run the company, supported by Christoph Schanz.

An international network of subsidiaries, long-standing representatives and partners, as well as an excellent service guarantees worldwide proximity to customers. As a technology leader and "hidden champion", FOERSTER continuously works on offering its customers individual solutions with new innovations and further product developments. Together with its customers, FOERSTER shapes the future in non-destructive testing.

FOERSTER
MIDDLE EAST FZE (FME)

We Make The Hidden Visible.

From Long Products to Deep Earth.

TS – Test Systems

High-performance ECT, UT, MFL, and Thermography systems for long products – bars, tubes, wires, billets and rails. Inline quality control for ferrous and non-ferrous metallic semi-finishe long

CT – Component Testing

Customized turnkey testing lines for fast, precise defect detection in automotive parts and forged components. Drives precision in safety-critical manufacturing.

IN – Inspection Services

Expert NDT solutions for reforming furnaces and fired heaters with proven reliability. Trusted by major refineries, petrochemical and DRI plants globally.

MT – Mobile Testing

On-site service, maintenance, and inspection operations – for MRO, aerospace, power generation, defense and maritime industries.
Keep operations running without disruption.

DS – Detection & Security

Advanced EOD, UXO and metal detection systems for defense, demining, and infrastructure security. Proven in the most challenging environments worldwide.

GLOBAL ENGINEERING SERVICES (GES)

EGYPT

Global Engineering Services (GES) is a certified provider of advanced non-destructive testing (NDT) and inspection services. With ISO 9001 & 45001 certifications and compliance with ASNT, API, and international NDT standards, GES offers reliable diagnostics to critical sectors including oil & gas, petrochemical, marine, civil construction, and power generation.

GES is a leading machinery and Equipment testing company in both mechanical and electrical fields. GES provides Predictive Maintenance PdM & Condition Monitoring of rotating machinery, Electrical Machine and Equipment Testing, Instrumentation and Control Testing, Ultrasonic Testing (UT), Radiographic Testing (RT), Magnetic Particle Testing (MT), Liquid Penetrant Testing (PT), Eddy Current Testing (ECT), Visual Testing (VT), Phased Array Ultrasonic Testing (PAUT), Time of Flight Diffraction (TOFD), Remote Visual Inspection (RVI), and advanced digital reporting, Welding activities, maintenance and commissioning activities. Our services in the field of PdM and Condition monitoring include but are not limited to: Vibration Analysis, Operating Deflection Shape (ODS), Modal Analysis, Rotor Dynamic Analysis, In- situ Dynamic Balancing, Laser Alignment, Machinery Fault Diagnostics, site Acceptance Testing, Thermography Surveys, Dynamic/Static Motor Current Analysis, Ultrasound, Flow Measurements and Machinery Performance Analysis.

At GES, we help clients catch failures early, reduce downtime, ensure compliance, and extend the life of vital assets. Our team of certified engineers brings precision, speed, and field reliability to every inspection

Category : Inspection & Consultancy Service

- Oil & Gas
- Petrochemical & Power Plants
- Steel Fabrication & Industrial Plants
- Marine & Offshore
- Civil Construction
- Utilities & Infrastructure

Serving a wide range of industrial sectors.

We serve critical industries with advanced diagnostic solutions — combining precision, speed, and field reliability.

Our Expertise

With certified engineers, industry-recognized standards, and cutting-edge diagnostic tools, GES delivers accurate, actionable data to help clients prevent failures before they happen.

We are ISO 9001 & 45001 certified and operate under ASNT, API, and international NDT protocols.

Services Offered

- Ultrasonic Testing (UT)
- Radiographic Testing (RT)
- Magnetic Particle Testing (MT)
- Liquid Penetrant Testing (PT)
- Eddy Current Testing (ECT)
- Visual Testing (VT)
- Phased Array Ultrasonic Testing (PAUT)
- Time of Flight Diffraction (TOFD)
- Remote Visual Inspection (RVI)
- Advanced Reporting & Digital Logs

Why GES

- **Catch Failures Early:** Detect flaws before they cause costly damage.
- **Cut Downtime:** Reduce repair cycles and unplanned outages.
- **Protect People:** Boost safety for workers and assets.
- **Stay Compliant:** Meet ASNT, ISO, and API standards.
- **Extend Asset Life:** Preserve the health and value of your equipment.

FRANCE

SREM Technologies is a prominent French industrial manufacturer and designer specializing in Non-Destructive Testing (NDT) equipment, accessories, and chemical consumables.

Founded in 1952, the company pioneered the introduction of France's first Magnetic Particle Inspection (MPI) bench (the Contromag C16) in 1953. Today, SREM Technologies operates as part of the Sofranel Group, a European leader in the NDT sector.

Core Specializations & Technologies

• Non-Destructive Testing (NDT): Expertise in detecting surface and subsurface defects without damaging materials.
• Key Inspection Methods: Magnetic Particle Inspection (MPI), Liquid Penetrant Testing (PT), Ultrasonic Testing (UT), and Eddy Current testing.
• FLUXO® Line: A globally recognized brand of in-house manufactured chemical consumables (penetrants, developers, and magnetic inks).
• Custom & Standard Equipment: Automated multi-test machines, UV-A LED projectors, demagnetizers, and measurement tools like the Analysse field analyzer.

HIGH-PERFORMANCE NDT CONSUMABLES BY SREM TECHNOLOGIES

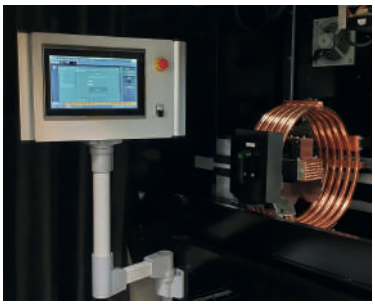

ADVANCED SOLUTIONS FOR PENETRANT & MAGNETIC PARTICLE TESTING

Formulated and manufactured in France, the **FLUXO** range is engineered to meet the most stringent demands of the aerospace, automotive, railway, and energy industries.

- Penetrant Testing (**PT**): Premium fluorescent and color contrast penetrants, developers, and removers for highly reliable, crisp indications.
- Magnetic Particle Testing (**MT**): High-sensitivity black, fluorescent, and visible magnetic inks and powders ensuring flawless surface inspection.

Available in aerosols, cans and bulk drums. Fully compliant with major international standards (**PMUC**, AMSE, RCCM, ISO, AMS, ASTM). **Biodegradable products also available !**

BEYOND CONSUMABLES: STANDARD & CUSTOM NDT EQUIPMENT

Contromag

Fluographe

Sondex

Lighting & accessories

As a global NDT partner, SREM Technologies leverages decades of expertise to design and manufacture robust, top-tier equipment:

- PT & MT Systems: featuring our Contromag magnetic benches and Fluograph penetrant testing lines, we provide everything from standard units to fully automated, custom-built installations.
- Ultrasonic Testing (UT): discover our Sondex range, which offers state-of-the-art portable instruments and high-precision testing systems .
- Lighting & Accessories: a comprehensive selection of high-quality UV/White light LED lamps, measuring devices, and reference blocks to guarantee the reliability of your inspections.

CHINA

DIYE Technology (often referring to Jiangsu Diye Inspect Technology) is a prominent high-tech enterprise specializing in the research, development, and manufacturing of advanced Non-Destructive Testing (NDT) equipment. Non-destructive testing is crucial in industrial engineering, allowing experts to evaluate the integrity and properties of materials, components, or entire structures without causing any permanent damage.

The company is widely recognized for its cutting-edge innovations in digital radiography (DR) and computed radiography (CR) systems. Their diverse product portfolio includes portable high-frequency X-ray generators, pipeline testing crawlers, flexible digital detectors, and AI-driven software tailored for precise inspection. These high-precision systems are critical for ensuring safety and structural soundness across vital industries, such as aerospace, shipbuilding, petrochemicals, pressure vessels, and oil and gas pipeline networks.

HATATEST

CHINA

Hatatest Technology Limited is a national high-tech enterprise specializing in Non-Destructive Testing (NDT) solutions and advanced industrial inspection systems. Founded with a strong focus on research and development, the company integrates software development and hardware manufacturing to deliver cutting-edge radiographic testing tools.

Hatatest's product portfolio includes portable and industrial Digital Radiography (DR) systems, X-ray generators, industrial CT systems, pipeline crawlers, NDT films, and specialized chemical kits. These technologies are widely applied across heavy and critical industries such as oil and gas (for pipeline and weld quality control), aerospace, shipbuilding, power generation, foundry, and military sectors.

A key differentiator for Hatatest is its commitment to innovation, holding numerous patents and intellectual property rights. The company has partnered with academic institutions like Beihang University to advance NDT research. By offering high-precision defect measurement tools and cloud-based image detection solutions, Hatatest helps industrial operators lower inspection costs while significantly improving safety, reliability, and defect-detection accuracy in critical infrastructure.

CHINA

EDDYSUN (Xiamen) Electronic Co., Ltd. is a premier high-tech enterprise specializing in the research, development, and manufacturing of Non-Destructive Testing (NDT) instruments. Founded in 1993 and headquartered in Xiamen, China, the company has established itself as a global leader in advanced industrial safety inspection technologies.

The company's extensive product portfolio spans critical NDT methods, including multi-frequency eddy current testing (ECT), digital ultrasonic testing (UT), metal magnetic memory testing (MMT), and magnetic flux leakage (MFL) equipment. A major milestone in Eddysun's innovation timeline was pioneering the world's first portable all-in-one instrument that integrates Eddy Current Array (ECA) and Phased Array UT (PAUT) technologies, which significantly enhanced structural integrity inspections across key industries.

With an unwavering commitment to quality and strict adherence to global certification standards like ISO9001, Eddysun serves as a vital technical partner for high-stakes sectors. It is a recognized and trusted supplier for the aerospace industry, major nuclear power facilities, and various global infrastructure testing agencies. Furthermore, Eddysun holds over 460 patents and has heavily contributed to drafting over 150 international and national NDT standards, solidifying its position as an industry pioneer.

EDDYSUN®

EDDYSUN (XIAMEN) ELECTRONIC CO., LTD.

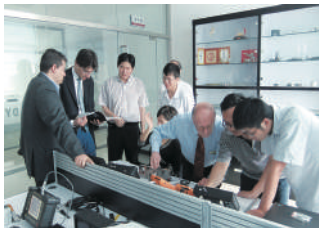

Eddysun (Xiamen) Electronic Co., Ltd. is a National High-tech Enterprise, a National Specialized, Sophisticated, and Novel "Little Giant" SME, a National Intellectual Property Demonstration Enterprise, a National-Local Joint Engineering Laboratory, and a Fujian Innovative Enterprise. Guided by the corporate philosophy of "Hard-working and Honest, Keep Improving", it is dedicated to the development, research, production, trade, and application services of intelligent non-destructive testing (NDT) instruments and equipment. Eddysun has developed a series of inspection technologies, including Eddy Current Array (ECA), Multi-Frequency Eddy Current, High-Speed Remote Field Eddy Current), Pulsed Eddy Current, Metal Magnetic Memory (MMM), Ultrasonic Testing (UT), acoustic pulse, Mechanical Impedance Analysis (MIA), Swept Frequency Acoustic, and Phased Array Ultrasonic Testing (PAUT). Eddysun pioneered the novel concepts of NDT Integration and Cloud-Based NDT Inspection/Monitoring, positioning itself at the forefront of NDT&E (Non-Destructive Testing & Evaluation) innovation.

Eddysun has presided two ISO international standards, led or participated in the drafting and revision of over 150 national and industry non-destructive testing standards. It holds more than 450 national invention and utility model patents. Besides, EDDYSUN has won more than 30 national Science and Technology Progress awards and provincial, ministerial and municipal awards. In 2010, it was approved to establish the Fujian Province Academician and Expert Workstation, and it was awarded the title of "National Demonstration Station" in 2016.

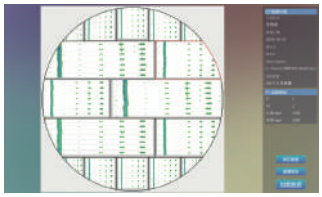

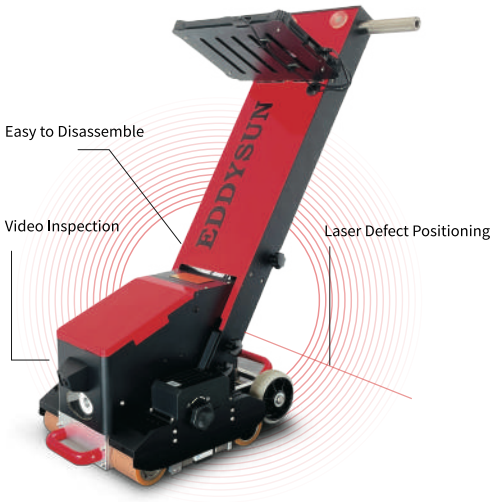

TANK-4000

TANK FLOOR LEAKAGE FLUX/EDDY CURRENT VIDEO INSPECTION SYSTEM

- Real-time Signal Acquisition & Analysis
- Applicable to Carbon Steel & Stainless Steel
- Automated Inspection Report Generation
- Top/Bottom Surface Defect Identification
- Laser Defect Positioning
- High-Definition Video Capture
- A-Scan / C-Scan Imaging
- Tank Floor Mapping

EEC-309

HIGH-SPEED REMOTE-FIELD EDDY CURRENT TESTER

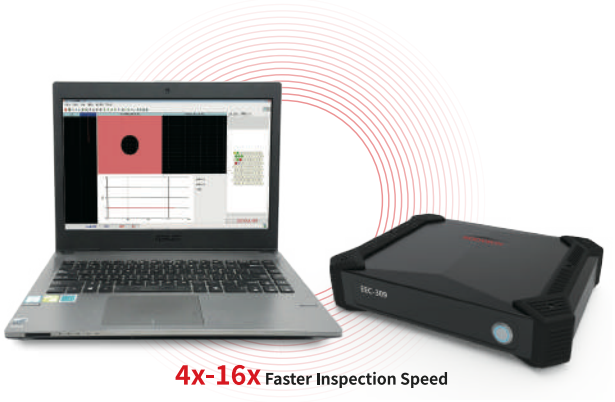

Particularly suitable for flaw detection, analysis, and evaluation of various ferromagnetic and non-ferromagnetic pipelines in petrochemical plants, water-gas plants, refineries, and power plants.

Low-Frequency Detection:
Frequency can be as low as tens of hertz, enhancing thick-walled pipe inspection capability.

Multi-Frequency Interference Suppression:
Effectively suppresses support plate interference signals.

High-Speed Scanning:
Inspection speed increased by 4–16 times, enabling highly efficient remote-field eddy current testing.

Synchronous Display:
Flaw detection and thickness measurement are displayed in real time on the same screen and performed simultaneously.

AMPP

EGYPT

The National Center for Training & Technical Consultations (NCTC) is a specialized provider of consultation, non-destructive testing (NDT), third-party inspection, asset verification, and certified technical manpower supply. Registered under the Egyptian General Petroleum Corporation (EGPC), NCTC serves critical infrastructure across the Oil & Gas, Marine, Energy, and Industrial processing sectors.

Most notably, NCTC operates as the Exclusive Authorized AMPP Licensee in Egypt, establishing a direct link between global protection benchmarks and local industrial execution.

AMPP – Association for Materials Protection and Performance

AMPP (Association for Materials Protection and Performance) is the world's leading authority in materials protection, corrosion control, and protective coatings. Established through the historic merger of NACE International (National Association of Corrosion Engineers) and SSPC (The Society for Protective Coatings), AMPP brings together more than 145 years of combined industry expertise and engineering excellence.

Global Reach: A worldwide professional community of more than 32,000 members across over 130 countries.

Industry Standards: Develops internationally recognized technical standards, certification programs, and educational frameworks covering surface preparation, protective coatings, cathodic protection, and materials performance.

Asset Protection: Supports the protection, reliability, and longevity of critical infrastructure by addressing corrosion, material degradation, and associated economic risks.

NCTC – Bringing Global Standards and Expertise Closer to Industry in Egypt.

SMART TRADER

EGYPT

At our factories in 10th of Ramadan Industrial City, we manufacture a wide range of specialized chemical products for maintenance, operation, and production, in cooperation with and under license from MTC LLC (USA), providing strong, highly efficient **MADE IN EGYPT** products as a local alternative to imported products.

Some of our products:

- Red dye & fluorescent penetrant crack and flaw detection kit (PT-NDT).
- Anti-spatter (CO_2) spray.
- Gas leak detection spray (for detecting low-pressure leaks).
- Anti-corrosion preservation and storage sprays (for short- and long-term storage).
- Penetrating oil spray.
- Oily & dry contact cleaner sprays (for electrical boards and electronic components).
- Various Silicone & anti-stick sprays.
- Anti-friction grease & chain lubricant sprays.
- Different types of oil, grease & carbon removers (with or without water rinsing).
- Hand-cleaning and disinfecting cream that eliminates bacteria and germs, helps prevent skin dryness and cracking, and neutralizes lingering odors on the hands.
- Rust stain and streak remover for painted, wooden, concrete, and fiberglass surfaces.

In general, our products are available in pressurized spray packages (aerosols) and liquid packages or containers of various sizes (from 0.25 kg to 1,000 kg), depending on the product type, its nature, method of use, and required quantity.

Our products offer professional, specialized alternatives to imported products and are ideal for use in the engineering and metalworking industries, plastics industry, automotive industry and vehicle maintenance, petroleum sector, marine sector, shipyards, transportation sector, energy sector and many other diverse industries and sectors.

Through our R&D department, we study our customers' diverse needs and develop suitable chemical products to meet their specific requirements. Research and sample preparation are provided free of charge. Simply contact us and present your needs or the problem you want us to solve.

INDUSTRIAL PRODUCTS
(Production - Operating - Maintenance)

MR. AID®

SMART TRADER - EGYPT

CRACK & FLAW AID
طقم الكشف عن الشروخ بالصبغة المخترقة
(غني بالصبغة الحمراء الفلوروسنتية - قابل للشطف بالماء)

DRY FLUSH AID
منظف جاف للكهربائيات والإلكترونيات ولجميع الأسطح
(سريع التطاير بلا أي أثر وآمن على أسطح البلاستيك والمطاط)

LIQUID TOOL AID
الزيت المتغلغل مذلل الصعاب متعدد الإستخدامات
(مذيب ومزيل للصدأ ومحرر للأجزاء ومانع صوت الصرير)

ELECTRO SHELD AID
طبقة حماية زجاجية غير موصلة للكهرباء
(مقاومة للرطوبة والتآكل والخدش ومانعة للتمليح وتماس الأقطاب)

WAXY SHIELD AID
شحم تخزين للفترات الطويلة ودرع حماية شمعي عازل
(مصمم للبيئات شديدة العدوانية وغير موصل للتيار الكهربائي)

GREASY SHIELD AID
شحم تخزين للفترات القصيرة سريع التنظيف
(لتخزين الاسطمبات المعدنية في الصناعات البلاستيكية)

ANTI SPATTER AID
مانع التصاق رايش وبلي وطرطشة اللحام
(منخفض الرائحة وآقل في إبعاث الأبخرة وقابل للشطف بالماء تماما)

GAS LEAKAGE AID
رغوة الكشف عن تسرب الغاز
(تحديد أصغر ضغط إيجابي للتسرب الغازي)

ALUMINUM AID
طبقة دهان ألومنيوم عازلة للأسطح
(سطح نهائي غني بالألومنيوم عازل ومضاد للتآكل والعوامل الجوية)

S.S.BICKLING AID
منظف منطقة خط اللحام في الإستانليس ستيل
(مزيل قوي ومنظف للتلون والإسوداد الناتج عن عمليات اللحام)

HARD SHIELD AID
درع حماية للأسطح المعدنية معالج بالبيتومين
(مقاوم لتآكل الأسطح وعازل ضد الماء والظروف المناخية ومشتت للصوت)

RUST CONVERT AID
محول الصدأ إلى طبقة عازلة تأسيسية
(يزيل الصدأ ويمنع إنتشاره ويمنع تكونه مستقبلا)

CERAMIC COAT AID
طبقة نهائية ودرع حماية قاسي بتكنولوجيا النانو
(يعطي سطح سيراميكي عازل مقاوم للبري التآكل والعوامل الجوية)

COLD WELD S. AID
عامل تعويض وإصلاح بأساس الإيبوكسي
(عالي التماسك ويقبل الخرط والتجليخ والتشغيل بعد الجفاف)

RVI Infinity Innovation

RVI Infinity Innovation is a company based in Germany, they are dedicated on design, develop and manufacture remote visual inspection products and solutions for industrial confined space inspection and quality control of NDT.

Professional and innovative solutions can help industrial companies and inspectors successfully reduce downtime, inspection costs and worker risk, they have been outputting thousands of products and solutions for wide range of industrial sectors and customers in different countries and regions.

Enppi
Training & Development

EGYPT

Enppi Training & Development was established in 1983 with a mission to support knowledge transfer, human capital development, and capability building across the Egyptian oil and gas sector. Building on this strong legacy, Enppi significantly expanded its specialized expertise, training facilities, and operational reach in the early 2020s, positioning itself to serve a broader spectrum of national and international oil and gas companies, promote unified training standards, and support sector-wide competency development.

Today, Enppi Training & Development stands as a leading provider of comprehensive, industry-focused learning solutions across upstream, midstream, and downstream activities. Through world-class training programs, competency development frameworks, and innovative learning approaches, Enppi empowers professionals and organizations to achieve operational excellence, enhance workforce capabilities, and drive sustainable performance across the energy sector.
Enppi Training & Development offers specialized learning solutions across a diverse portfolio of technical, operational, and business disciplines, including:

- Oil & Gas Operations (Upstream, Midstream, and Downstream)
- Health, Safety, Environment & Quality (HSEQ)
- QEHS Management Systems
- Information Technology & Digital Solutions
- Contracts & Commercial Management
- Human Resources Management
- Sales & Marketing Excellence
- Business Administration
- Finance & Accounting
- Supply Chain & Procurement Management
- Leadership & Management Development
- Soft Skills & Professional Effectiveness

EGYPT

Inspecta International is a leading global provider of inspection, testing, and asset integrity services for the oil, gas, energy, and industrial sectors. Founded to ensure operational safety and compliance, the company specializes in non-destructive testing (NDT), traditional and advanced inspection techniques, and comprehensive quality assurance. By leveraging cutting-edge technology and a team of highly certified experts, they help industrial operators minimize downtime, prevent catastrophic failures, and extend the overall lifespan of critical assets like pipelines, pressure vessels, and storage tanks.

At its core, the company delivers data-driven engineering assessments and risk-based inspections that align with stringent international safety standards. Their technical capabilities span from specialized conventional NDT to advanced automated ultrasonic testing, providing precise structural valuations under demanding conditions. Inspecta International serves as a trusted partner for global energy giants, helping them navigate complex regulatory frameworks while optimizing maintenance costs. Through continuous innovation and an unwavering commitment to health, safety, and environmental (HSE) excellence, Inspecta International remains a cornerstone of industrial reliability worldwide, ensuring that high-risk infrastructure operates safely, efficiently, and sustainably across global supply chains.

FRANCE

SHERWIN BABBCO is a joint venture between BABBCO and SHERWIN INC. (based in the USA). SHERWIN BABBCO is the Exclusive Distributor of Sherwin products in Europe and Africa. BABBCO operates the distribution of Sherwin's NDT products for SHERWIN BABBCO.

BABBCO was founded in 1952 near Paris, in France. Today, it is one of the leading european Non Destructive Testing specialist in penetrant testing and magnetic particle inspection. We are a medium-sized company, which makes us more agile and responsive to answer all your NDT needs and bring you a customized support. The primary objective of our ISO 9001:2015 and ISO 14001:2015 certified Quality Environment system is customer satisfaction.

BABBCO is a subsidiary of SOCOMORE Group, a french worldwide player specialized in surface preparation, treatment, protection and coatings.

Beyond PT and MT, BABBCO offers specialized solutions across various inspection methods:

- Ultrasonic Testing (UT): A full range of chemical products and equipment.
- Visual Testing (VT): Advanced video-endoscope materials.
- Surface Replication (MICROSET): Our Microset brand offers high-strength elastomeric materials for surface defect characterization and metallography. These replicas are dimensionally stable, allowing for precise geometric measurement of inaccessible internal surfaces and long-term storage for future reference.
- Lighting Solutions: Versatile LED lighting designed to replace traditional mercury luminaires, supported by our comprehensive light distribution engineering services.

UAE

Pulsar FZC is a pioneering engineering and technology firm headquartered in the Sharjah Airport Free Zone (SAIF Zone), United Arab Emirates. The company has established itself as a world-class developer and manufacturer specializing in advanced Non-Destructive Testing (NDT) equipment and automated industrial inspection solutions.

Pulsar FZC focuses heavily on science-based innovations, engineering cutting-edge hardware and integrated software systems. Their core expertise includes Phased Array Ultrasonic Testing (PAUT), 3D visualization, and automated data analysis. These advanced systems are critical for maintaining high safety and reliability standards across major industrial sectors, such as railway networks (inspecting rails, turnouts, and welded joints), aerospace (testing composite materials and aircraft components), shipbuilding, wind energy, and oil & gas.

Equipped with state-of-the-art facilities, including an advanced testing laboratory and a certified training center, the company handles everything from initial prototyping to mass production. Pulsar FZC maintains active engagement in the global supply chain, regularly importing specialized components and exporting its highly technical instruments to international markets like India. By prioritizing precision, automation, and digital reporting, the company continues to build strategic partnerships with public and private enterprises worldwide.

Sigma Embedded Engineering EG develops intelligent robotics and automation solutions, integrating robotic software, Physical AI, computer vision, embedded systems, and automotive software engineering. From perception and motion planning to autonomous workflows, hardware integration, and real-world deployment, we deliver practical, intelligent engineering solutions.

OUR EXPERTISE

01 ROBOTICS & AUTOMATION
Industrial robotics, ROS 2, motion planning, robot control, and intelligent automation.

02 PHYSICAL AI & COMPUTER VISION
Vision-guided robotics, 3D perception, object detection, segmentation, and AI-driven manipulation.

03 AGENTIC AI & INTELLIGENT SOFTWARE
AI-assisted workflows, tool-connected agents, backend services, APIs, and system integration.

04 EMBEDDED & AUTOMOTIVE SOFTWARE
Adaptive AUTOSAR systems | ADAS-focused embedded software
Simulation-based solutions | Hardware integration & testing
Engineering consulting and embedded software development.

05 INTERNET OF THINGS (IoT)
Connected devices, sensor integration, and IoT monitoring solutions.

06 RESEARCH AND DEVELOPMENT
Custom solutions, prototyping, proof-of-concept validation, and product engineering.

CERTIFICATION OF CONFORMITY SERVICES

EGYPT

A Certificate of Conformity (CoC) is an official document declaring that a product meets required technical, safety, and quality standards. Issued by an authorized body or the manufacturer, it ensures compliance with specific regulations, industrial standards, or national laws before a product enters the market.

This certificate plays a critical role in international trade and global logistics. Customs authorities frequently require a CoC to clear goods, preventing the import of unsafe or counterfeit products. By proving that a product has undergone rigorous testing and inspection, the certificate minimizes risks for consumers and ensures public safety. Industries such as automotive, electronics, medical devices, and manufacturing rely heavily on these documents to maintain regulatory alignment across different borders.

For businesses, obtaining a CoC is essential for smooth market access and building consumer trust. It demonstrates a commitment to quality and simplifies the supply chain process by avoiding costly border delays or product rejections. In summary, a Certificate of Conformity acts as a regulatory passport for goods, protecting consumers while facilitating legal and efficient global commerce.

EGYPT

Established in 1985 by Naguib Gwefel, El-Kadesia Engineering Industries has grown to become the premier Egyptian market leader in the manufacturing and distribution of Shielded Metal Arc Welding (SMAW) electrodes. With over 40 years of accumulated industry experience, the company is recognized as a major industrial cornerstone across Egypt and the Middle East and North Africa (MENA) region.

Headquartered in Heliopolis, Cairo, with its main manufacturing facility located in the 10th of Ramadan City, El-Kadesia leverages state-of-the-art production technologies to ensure outstanding precision. The company specializes in an extensive range of high-quality welding electrodes, including rutile, cellulosic, low-hydrogen, low-alloy, high-alloy, hardfacing, cast iron, and nickel alloy electrodes.

Committed to international standards, El-Kadesia holds ISO 9001 certification alongside critical global maritime approvals from major international classification bodies like ABS, Lloyd's Register (LR), and DNV. These certifications establish the brand as a highly trusted supplier for critical and complex engineering sectors, notably including oil and gas, shipbuilding, petrochemicals, heavy maintenance, electrical power infrastructure, construction, and transportation. Driven by continuous innovation and exceptional customer service, El-Kadesia supplies high-grade standard welding products while actively supporting heavy industries across European, African, and Middle Eastern markets.
